Lean Six Sigma Green Belt Certification | Syracuse University
Google Data Analytics Certification | Google | Coursera
Advanced Software Development in Python Certification | Code Fellows

PROFESSIONAL EXPERIENCE

Sage Door Holdings | Seattle, WA Product Development Analyst

2018 - 2022

Operated as Director of New Products. Provided aid to senior executive leadership in the bidding process and production estimates to bring new ideas to market.

- As a new company in an emergent field, they developed a data-oriented business model that employed advanced excel skills to optimize and generate per-unit profit margins on future products. This model secured a contract for more than 40% of our market in late 2018.
- Coordinated; all production cycles, product design, sourcing, timeline management, and project closures.

Managing Director

Responsible for multiple processing plants and farms throughout Oregon and Washington.

- Created data dashboards to measure production metrics, output visualizations, cost per unit, production estimates, and time remaining to produce.
- Developed and employed Monte-Carlo methods in excel to assess farm profitability; initiated Enterprise Resource Planning (ERP) implementation in 2 separate facilities.

Circanna LLC | Seattle, WA

2015 - 2018

General Manager | Operations Manager

Utilized skills such as data analysis, spreadsheets, budget analysis, and logistical management to make effective company decisions while in adherence to local, state, and federal regulations.

- After a company-wide restructure, led a data mining initiative to render operational business intelligence, which increased sales by over 400% in the 12 months after program completion.
- Used Lean Tools (5s, Poka-yoke, Gemba, Kanban, JIT/Pull Manufacturing) to reduce steps, eliminate waste, and initiate continuous improvement principles.
